AI-powered contract risk assessment and recommendations

Contract	PWC-Customer-Contract-2026-accessible.pdf	
AI RISK SCORE	OVERALL RISK	CONFIDENCE
45%	Medium	95%

1. Executive Summary

- This is a legally binding customer contract for water, sewerage, and electricity services with Power and Water Corporation in the Northern Territory.
- The contract takes effect automatically without requiring a signature once the customer begins using the services.
- The terms grant the utility broad rights to restrict water or disconnect electricity for non-payment, unsafe installations, or failure to provide meter access.
- It severely limits the utility's liability for service interruptions or failures unless caused by bad faith or negligence.

2. Risky Clauses

Clause	Risk
Power and Water will not be liable for any damages or penalties arising out of a partial or total failure to supply water or sewerage services to you, unless the failure is due to an act or omission done or made by Power and Water in bad faith or through negligence.	High
If you fail to return the completed medical practitioner certification to us, your premises may be deregistered. If deregistration occurs, you will no longer be entitled to the protections associated with registering as a life support. ... Registration does not guarantee uninterrupted electricity supply.	High
If your account was undercharged for more than 9 months, Power and Water will limit recovery to that 9-month period from the date written notice is issued, unless the cause was outside our control (e.g. we did not have safe access to the meter).	Medium
A service fee will apply if we attend your property to carry out the restriction, regardless of whether the supply is physically restricted or not.	Medium
Only one refund is permitted per quarter per customer.	Low

3. AI Recommendations

✓ Ensure continuous, safe, and unobstructed physical access to all meters on your property to prevent expensive substituted readings and maintain the protection of the 9-month back-billing recovery cap.

✓ If dependent on life support equipment, proactively submit the required medical practitioner certification annually and maintain a backup emergency plan as continuous power supply is explicitly not guaranteed.

✓ Act promptly within the specified 90-day window to rectify any non-compliant water meter assemblies identified on your side of the property to prevent service restriction.

✓ Seek immediate billing support or payment plans before accounts go overdue to prevent disconnection, restriction, or the accumulation of non-refundable attendance fees.
